

FCSWWS Water Sensor

System Grade Reliability and Response

The FCSWWS series of wireless water sensors are designed to alert you before disaster happens and help reduce the risk of water damage. It is a perfect solution for monitoring water leaks in building common areas, utility rooms, compressor trays, in-suite kitchens, bathrooms, etc. The FCSWWS can also connect with add-on optional extendable water probes for hard-to-reach areas or to increase the detection zone. Completely wireless, the FCSWWS can easily be installed anywhere needed and provide peace of mind.

The FCSWWS is part of an overall water detection system offered by Condoplex to provide on-site NOT CLOUD alarms to your guard or management staff. The FCSWWS instantly sends an alarm signal over a closed network to the guard screen when detecting water.

A Restore function ensures a prompt response to the suite. The reliable and robust FCSWWS radically reduces flood risks in any Condominium and saves the resident and facility from the potentially exorbitant costs associated with water damage restoration.

Features

- Two types of mounting: wall or ground deployment
- Extendable water probe and water sensing cables for hard-to-reach areas
- Regular supervision signals to check system integrity
- Low battery detection
- Out of Range

Specification

Frequency	915 MHz / LORA
Power Source	3V, CR123A Lithium Battery x 1
Battery Life	5 years*
Indicators	LED and Audible annunciation to Signal presence of water
Operating Temperature	-10°C to 45°C (14°F to 113°F)
Operating Humidity	Up to 85% non-condensing
Dimensions	85mm x 28mm

* Note: Actual battery life may vary with product settings, operating environment, and usage. Specifications subject to change without notice.
